# Morgan Stuckey

Muncie, IN · (260) 888-9126 · mo@morganstuckey.com · morganstuckey.com

MBA candidate (AI concentration) with a B.S. in Psychology from Indiana University and a background in behavioral health. While in the program I've built a series of small tools to sharpen my skills, and kept the ones that worked: a lead-scoring pipeline, a local-LLM finance dashboard, client websites. Looking for analytics or operations work where the job is spotting manual effort and getting rid of it.

## EDUCATION

**Ball State University, Miller College of Business** — MBA, AI concentration 2026 – Present
Coursework: Financial Accounting & Corporate Finance (BUSA 601), Operations Management (BUSA 603), ECON 602 (in progress), statistics and data analysis in Excel.

**Indiana University Bloomington** — B.S., Psychology Aug 2020 – May 2024

## SOFTWARE PROJECTS

**Local business lead-scoring pipeline** — Python, Alpine.js, Google Places API
- Pulls businesses by area, audits each homepage for weakness signals, scores and ranks leads, and tracks outreach in a kanban board. Deployed on a private subdomain and used for actual prospecting.

**Personal finance dashboard** — FastAPI, SQLite, Alpine.js, Ollama
- Polls bank email via IMAP, imports CSV statements, and auto-categorizes transactions with a locally hosted language model (qwen3). Runs entirely on my own machine; no data leaves it.

**BatchCards** — batchcards.bramblefold.com
- AI-assisted wedding thank-you card generator with a Python/Pillow/ffmpeg content pipeline for Pinterest and three SEO guide pages.

**morganstuckey.com** — Cloudflare Pages
- Portfolio plus demo sites for local businesses (chiropractic, bike shop, farm market) used as sales tools.

## EXPERIENCE

**Freelance Web Developer** — Muncie and Fort Wayne, IN 2026 – Present
- Build and host one-page sites for local businesses that have none; pitch in person and propose low monthly retainers for updates and photos.

**AI Evaluation Contractor, DataAnnotation** — Remote 2026 – Present
- Write rubrics and evaluate model outputs for RLHF projects; passed the coding assessment track. Project content under NDA.

**Private Caregiver** — Francesville, IN Oct 2025 – Dec 2025
- Full health management for a family member: medication, symptom and behavioral tracking, mobility assistance, nutrition.

**Registered Behavior Technician, Maple Seed Farms** — Fort Wayne, IN Jun 2025 – Oct 2025
- Delivered ABA therapy to minors and adults under BCBA supervision; owned documentation, daily schedules, and community outings.

**Athlete & Delivery Driver, Sunnybank RFC / Australia Post** — Brisbane Jan 2025 – Jun 2025
- Rostered for Queensland Premier rugby while running high-volume parcel routes on strict time windows.

**Direct Support Professional, Stone Belt** — Bloomington, IN Jan 2023 – Dec 2024
- Supported adults with intellectual and developmental disabilities: medication management, behavioral support, crisis response, and precise daily documentation.

## SKILLS

AI: prompt design and output evaluation, RLHF rubric writing, local model deployment with Ollama, LLM-driven classification pipelines. Software: Python, JavaScript (Alpine.js), FastAPI, SQLite, REST APIs (Google Places, IMAP), Cloudflare Pages. Analysis: Excel (PivotTables, descriptive statistics), behavioral data collection and documentation.

## ATHLETICS & LEADERSHIP

**Ball State University Rugby** — Volunteer Assistant Coach Fall 2026 – Present

**Indiana University Women's Rugby** — Secretary; NCR All-American, 2023 2023 – 2024

**Sunnybank Rugby Club, Brisbane** — Premier / Reserve grade, 15s season 2025
